Lecture course on Classical and Quantum Dynamical Entropies

By Prof. Fabio Benatti

Department of Physics, University of Trieste, Italy

Kolmogorov dynamical entropy provides a link between the entropy production in classical ergodic systems and the algorithmic complexity of phase trajectories. Using the algebraic approach to quantum statistical mechanics, the course offers a short introduction to these concepts and to their extensions to quantum dynamical systems.

Lecture 1	8 March 2014, 17 Esfand 1392	Time: 16:30-18:30
Lecture 2	9 March 2014, 18 Esfand 1392	Time: 16:30-18:30
Lecture 3	10 March 2014, 19 Esfand 1392	Time: 16:30-18:30
Lecture 4	11 March 2014, 20 Esfand 1392	Time: 16:30-18:30
Lecture 5	12 March 2014, 21 Esfand 1392	Time: 16:30-18:30

Location: Room 412.
